Cooperative network project

of teaching, research and extension

in basic education schools

The Cooperative Network for Teaching, Research and Extension in Basic Education Schools connects teachers from the Professional Master's Degree Program in Education - Teacher Training for Basic Education, from UNIUBE and from schools in the Public Basic Education Networks, with the aim of fostering the production and dissemination of plural knowledge, the development of collaborative teaching, research and popular extension projects, the creation of digital libraries of basic education teachers' experiences and communities of research and communication of knowledge in cooperative basic education institutions, with a view to improving the social quality of education.
